

SHARNDEEP KAUR

DATA SCIENCE AND DATA ANALYSIS

Contact Info

- +91 8360053728
- sharnsaini625@gmail.com
- Hoshiarpur, Punjab, India.
- linkedin.com/in/sharndeeep-kaur

Technical Skills

- Python, Java, C/C++.
- Numpy, Pandas, Seaborn, Matplotlib, Scikit-learn, Plotly, Tensorflow.
- Html5, CSS3, JS..
- EDA, Data Cleaning, Data Analysis.
- AI, ML, DL.
- SQL, Power BI.

Soft Skills

- Communication & Presentation Skills.
- Collaboration & Teamwork.
- Adaptability & Continuous Learning.

Projects

- Harry Potter Invisibility Cloak (OpenCV, Python).
- Hotel Management System (VB.NET).
- Web Scraping Project – Books Data Extractor.

PROFILE OVERVIEW

Highly motivated and detail-oriented Data Science enthusiast with hands-on experience in data analysis, deep learning, computer vision, and generative AI. Skilled in building and evaluating machine learning models, extracting insights from complex datasets, and developing AI-driven solutions. Proficient in applying statistical methods, visualization techniques, and modern AI frameworks to solve real-world problems.

EDUCATION

MCA (AI/ML) 2024 - PRESENT
GNA University, Phagwara, India.

- Specialized coursework and projects in Data Science, Machine Learning, and Deep Learning, focusing on practical applications with Python, SQL, and modern AI frameworks.
- Hands-on experience in Data Analysis and Computer Vision, applying statistical techniques, visualization, and AI models to extract insights from real-world datasets.

BCA 2020 - 2023
DAV College, Hoshiarpur, Punjab, India.

- Gained strong foundation in Computer Programming, Software Development, and Database Management.
- Practical experience with Python, Java, and C/C++, focusing on problem-solving and application development.

EXPERIENCE

Data Science Intern Jun 2025 - Aug 2025
O7 Services, Hoshiarpur, Punjab, India.

- Worked on data analysis projects using Python, Pandas, NumPy, and SQL to clean, preprocess, and analyze large datasets.
- Created data visualizations and dashboards to present findings to mentors and stakeholders.
- Project: Remote Job Health Solutions – Developed a data-driven solution to analyze the impact of remote jobs on employee health and well-being. Performed EDA, dashboards, and visual insights on burnout, work-life balance, and salary trends.
- Technologies Used: Python, Pandas, Matplotlib, Streamlit, SQLite.
